COURSEWORK

UNDERGRADUATE
Data Structures + Practicum
Algorithm + Practicum
Python + Practicum
Structured Query Language(SQL)
Operating Systems and OOPS

EXPERIENCE

TEKION CORP | Associate Software Engineer
Jan 2022 - Ongoing | Bengaluru, India

- Build a dashboard app for **Chatbot**, that helps dealers to setup their bots.
- Developed a feature that helps the agent to transfer the chat with information and get data in real-time using **Pusher** implementation.
- Developed a **Contact Center Application** that helps supervisors to communicate with all dealers and also implements agent availability based on his/her activeness on the website using **Web Worker**.
- Developed a feature that alerts the employee that you are going to sign out in minutes from the working platform. This features also send an alert to the manager if any employee going to sign out before the end up of working hours.
- Improved the efficiency of the **Employee Hour Application** by optimizing the code and removing repeated API calls.
- Technology : **React, Redux, Web Worker, Pusher, Javascript, ES6.**

KRISHIFY | Software Engineer Intern
March 2021 - May 2021 | Gurgaon, India

- Created a **Polling Page** regarding Farmer Bill which helped a lot in the marketing of this company.
- Created an **Animal Sell Page** here, that helps farmers to sell animals with many information. This was also very helpful to increase the followers of this company.

SMART ROOM VENTILATOR, IIITDM JABALPUR | Full Stack Developer
Feb 2020 - Aug 2020 | Jabalpur, India

- Real time monitoring the quality of air and analyzing the data on an web app.
- Sponsored by **DIC, MHRD, Govt. Of India** and Mentor by **Dean of Discipline and Dean of Academic**.

PROJECTS

SOCIALMEDIA APP | MERN,JavaScript,Bootstrap4,Git,REST API
🔗 | 🐙

- Explore the capabilities of the MERN stack by implementing social media features, such as **post sharing, liking, commenting, following friends, and an aggregated newsfeed**.

FILE SHARING APP | MERN,JavaScript,Bootstrap4,REST API
🔗 | 🐙

- In this project, I have created an API for File Sharing App using Node JS, Express JS, and MongoDB. and I learned how to upload files through node js. For that, I used a package named **Multer**. In the end, I deployed this project to a live server.

AWARDS

- Grand Finalist, **Smart India Hackathon 2020** under the **Ministry of Rural Development**.
- In **Science Olympiad Foundation** secured **2nd in state**
